Artificial Intelligence: Workless Society: When Robots Take Our Jobs Kalman Toth M.A. M.PHIL.

AI will find cures for cancer, diabetes, Alzheimer's and Parkinson's diseases. AI will develop a tasty diet everyone can follow who is concerned about overweight. AI will drive our cars when we are tired. AI will do our jobs better than we can. Within a few years we, humans, will be completely and totally redundant. Millions of Artificial Intelligence units on computer network platform and mobile robots with built-in AI box will perform most of the work. Retirement benefits will start at age 20. The Golden Age of Artificial Intelligence coming faster than the speeding bullet with 130 IQ robots, 500 IQ AI on office computer networks and 250 IQ AI driver in tractor-trailers. AIs & robots will do all jobs except those mandated to humans by law like congressman or mayor. In the workless society government pays Citizen's Income to everybody not to work, just enjoy life. What if the robots rebel? What if they take over the government? What if they start killing humans? What if they wipe out human civilization? What do we do? Those are the questions we need to answer before we deploy robots by the millions. This book in addition to the author's view has lots of quotes from articles thus substantiating the current state and future of Artificial Intelligence. The thought provoking book is a must for all interested in the exciting future with machine intelligence just around the corner.
