Programming Erlang: Software for a Concurrent World (Pragmatic Programmers) Joe Armstrong

A multi-user game, web site, cloud application, or networked database can have thousands of users all interacting at the same time. You need a powerful, industrial-strength tool to handle the really hard problems inherent in parallel, concurrent environments. You need Erlang. In this second edition of the bestselling *Programming Erlang*, you'll learn how to write parallel programs that scale effortlessly on multicore systems.

Using Erlang, you'll be surprised at how easy it becomes to deal with parallel problems, and how much faster and more efficiently your programs run. That's because Erlang uses *sets of parallel processes*-not a single sequential process, as found in most programming languages.

Joe Armstrong, creator of Erlang, introduces this powerful language in small steps, giving you a complete overview of Erlang and how to use it in common scenarios. You'll start with sequential programming, move to parallel programming and handling errors in parallel programs, and learn to work confidently with distributed programming and the standard Erlang/Open Telecom Platform (OTP) frameworks.

You need no previous knowledge of functional or parallel programming. The chapters are packed with hands-on, real-world tutorial examples and insider tips and advice, and finish with exercises for both beginning and advanced users.

The second edition has been extensively rewritten. New to this edition are seven chapters covering the latest Erlang features: maps, the type system and the Dialyzer, WebSockets, programming idioms, and a new stand-alone execution environment. You'll write programs that dynamically detect and correct errors, and that can be upgraded without stopping the system. There's also coverage of rebar (the de facto Erlang build system), and information on how to share and use Erlang projects on github, illustrated with examples from cowboy and bitcask.

Erlang will change your view of the world, and of how you program.

What You Need

The Erlang/OTP system. Download it from erlang.org.

From reader reviews:

Marlene Childs:

Do you one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Aim to pick one book that you find out the inside because don't judge book by its cover may doesn't work is difficult job because you are frightened that the inside maybe not as fantastic as in the outside search likes. Maybe you answer can be Programming Erlang: Software for a Concurrent World (Pragmatic Programmers) why because the great cover that make you consider regarding the content will not disappoint a person. The inside or content is actually fantastic as the outside or perhaps cover. Your reading 6th sense will directly direct you to pick up this book.

Robert Hyde:

This Programming Erlang: Software for a Concurrent World (Pragmatic Programmers) is great book for you because the content that is full of information for you who always deal with world and possess to make decision every minute. This specific book reveal it info accurately using great arrange word or we can state no rambling sentences inside. So if you are read that hurriedly you can have whole info in it. Doesn't mean it only gives you straight forward sentences but difficult core information with lovely delivering sentences. Having Programming Erlang: Software for a Concurrent World (Pragmatic Programmers) in your hand like having the world in your arm, data in it is not ridiculous a single. We can say that no guide that offer you world within ten or fifteen minute right but this reserve already do that. So , this is certainly good reading book. Hey Mr. and Mrs. hectic do you still doubt that?

Sandra Davis:

As we know that book is important thing to add our expertise for everything. By a book we can know everything we wish. A book is a group of written, printed, illustrated or even blank sheet. Every year was exactly added. This guide Programming Erlang: Software for a Concurrent World (Pragmatic Programmers) was filled concerning science. Spend your free time to add your knowledge about your scientific research competence. Some people has different feel when they reading a new book. If you know how big benefit of a book, you can sense enjoy to read a publication. In the modern era like today, many ways to get book that you just wanted.

Linda Meier:

A lot of guide has printed but it differs from the others. You can get it by internet on social media. You can choose the best book for you, science, amusing, novel, or whatever by simply searching from it. It is named of book Programming Erlang: Software for a Concurrent World (Pragmatic Programmers). Contain your knowledge by it. Without departing the printed book, it might add your knowledge and make a person happier to read. It is most crucial that, you must aware about book. It can bring you from one place to other place.
