Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund)

Until recently, surprisingly little has been known about the biology and behavior of tropical forest raptors, including such basic aspects as diets, breeding biology, habitat requirements, and population ecology, information critical to the development of conservation efforts. The Peregrine Fund conducted a significant eight-year-long research program on the raptor species, including owls, in Tikal National Park in Guatemala to learn more about Neotropical birds of prey. Impressive and unprecedented in scale, this pioneering research also involved the development of new methods for detecting, enumerating, and studying these magnificent but often elusive birds in their forest home. Beautifully illustrated with photographs of previously little-known species, the resulting book is the most important single source for information on the lowland tropical forest raptor species found in Central America.

Neotropical Birds of Prey covers twenty specific species in depth, including the Ornate Hawk-Eagle, the Barred Forest-Falcon, the Bat Falcon, and the Mexican Wood Owl, offering thorough synopses of all current knowledge regarding breeding biology and behavior, diet, habitat use, and spatial needs. Contributors to this landmark work also show how the populations fit together as a community with overlapping habitat and prey needs that can put them in competition with reptiles and mammalian carnivores as well, yet differ from one another in their nesting or feeding behaviors and population dynamics. The work's substantive original data offer interesting comparisons between tropical and temperate zone species, and provide a basis for establishing conservation measures based on firsthand research. Making available for the first time new data on the biology, ecology, behavior, and conservation of the majestic owls and raptors of the New World tropics, this book will appeal to a wide ornithological readership, especially the many raptor enthusiasts around the world.

From reader reviews:

Tessie Springfield:

Now a day individuals who Living in the era exactly where everything reachable by talk with the internet and the resources included can be true or not involve people to be aware of each information they get. How people have to be smart in obtaining any information nowadays? Of course the answer is reading a book. Reading through a book can help persons out of this uncertainty Information specially this Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund) book because book offers you rich info and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it you know.

Kathleen Bosarge:

Hey guys, do you would like to finds a new book to learn? May be the book with the concept Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund) suitable to you? The actual book was written by popular writer in this era. Typically the book untitled Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund)is the one of several books that will everyone read now. That book was inspired many men and women in the world. When you read this guide you will enter the new dimensions that you ever know prior to. The author explained their strategy in the simple way, thus all of people can easily to recognise the core of this e-book. This book will give you a lots of information about this world now. So you can see the represented of the world in this book.

Elsie Wallace:

That reserve can make you to feel relax. This book Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund) was colorful and of course has pictures around. As we know that book Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund) has many kinds or genre. Start from kids until young adults. For example Naruto or Detective Conan you can read and think you are the character on there. Therefore , not at all of book are generally make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading in which.

Patricia Stroud:

As a pupil exactly feel bored to be able to reading. If their teacher expected them to go to the library as well as to make summary for some e-book, they are complained. Just little students that has reading's soul or real their passion. They just do what the professor want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that reading is not important, boring and can't see colorful photos on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's

country. Therefore , this Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund) can make you feel more interested to read.
